

SOFTWARE REQUIREMENTS SPECIFICATION

SilverBricks Connect

Integrated Services Marketplace Platform

Version	2.0 – Public Release
Document Status	Final
Prepared By	Silver Bricks Product Team
Date	14 May 2026
Classification	Public
Scope	Trades, Bookings & Marketplace

1. Introduction

1.1 Purpose

SilverBricks Connect is a fully integrated, two-sided digital marketplace platform that unifies three distinct service ecosystems into a single, cohesive product:

- TradeConnect – A verified tradesperson directory and job-posting marketplace
- Hire-A-Me – A real-time instant-hire module for on-demand trade services
- BookEasy Hub – An appointment booking and business listing platform for salons, healthcare providers, event venues, and professional services

This Software Requirements Specification (SRS) document defines the complete functional, non-functional, and system requirements for the SilverBricks Connect platform. It is intended for use by developers, designers, QA engineers, project managers, and investors.

1.2 Scope

The platform enables:

- Customers to discover, compare, book, and review service providers
- Trade professionals to build profiles, receive leads, submit quotes, and manage jobs
- Businesses (salons, clinics, venues, etc.) to list services, manage bookings, and accept payments
- Administrators to moderate the platform, verify providers, and monitor activity

Note: Payment processing and AI matching features are designated as Phase 2 deliverables.

1.3 Definitions & Acronyms

Term	Definition
SRS	Software Requirements Specification
Tradie	Australian colloquial term for trade professional (plumber, electrician, etc.)
Lead	A job request sent to matching tradespeople or businesses
Quote	A formal price offer submitted by a tradesperson in response to a job post
Booking	A confirmed appointment made by a customer with a business or provider
Proposal	A detailed business document including scope, pricing, and terms
MVP	Minimum Viable Product — first releasable version
KYC	Know Your Customer — identity and license verification
SSO	Single Sign-On

Term	Definition
API	Application Programming Interface
UI/UX	User Interface / User Experience

1.4 Intended Audience

Audience	Purpose
Development Team	Build and implement the system per these specifications
QA Engineers	Test all functional and non-functional requirements
Product Managers	Track feature scope, backlog, and release milestones
UI/UX Designers	Design interfaces aligned with user flows defined here
Business Stakeholders	Understand platform capabilities and commercial model
Investors / Public	Evaluate the product vision and technical roadmap

1.5 Document Overview

This document is organised as follows:

1. Introduction – Purpose, scope, definitions, and stakeholders
2. System Overview – High-level architecture and user types
3. TradeConnect Module – Tradesperson directory and job marketplace
4. Hire-A-Me Module – Instant on-demand trade hiring
5. BookEasy Hub Module – Bookings and business listings
6. Functional Requirements – Detailed feature specifications per user role
7. Non-Functional Requirements – Performance, security, and scalability
8. Business Workflow – End-to-end process flows
9. Platform Structure – UI category architecture
10. Business Model – Revenue streams and monetisation strategy
11. Future Enhancements – Phase 2 and Phase 3 roadmap
12. Appendices – Data models, glossary, and revision history

2. System Overview

2.1 Platform Architecture

SilverBricks Connect is a web-first, mobile-responsive platform built on a three-layer service model:

Layer	Description	Primary Modules
Customer Layer	All touchpoints for end-users seeking services	Search, Booking, Job Posting, Reviews, Payments
Provider Layer	Tools for tradespeople and businesses to manage operations	Profile Builder, Lead Manager, Quote Engine, Calendar
Admin Layer	Platform management, compliance, and analytics	Approval Dashboard, Dispute Centre, Analytics Suite

2.2 User Types

2.2.1 Customers / Homeowners

Individuals or organisations seeking trade or professional services. Customers can post jobs, browse provider profiles, book appointments, submit payments, and leave reviews.

2.2.2 Trade Professionals (Tradespeople)

Licensed or unlicensed skilled workers offering services across 14+ trade categories. They can create profiles, receive and respond to job leads, submit quotes, and track job history.

2.2.3 Business Owners

Owners of salons, healthcare practices, event venues, and other service businesses. They list their services, manage real-time bookings, create proposals, and engage with customers.

2.2.4 Platform Administrator

Anthropic-level internal operators responsible for approving providers, moderating reviews, managing categories, handling disputes, and accessing analytics dashboards.

2.3 High-Level System Flow

The platform operates on a unified request-response loop across all modules:

Step	Actor	Action
1	Customer	Registers and logs in to the platform
2	Customer	Posts a job OR searches for a service/business
3	System	Matches customer with relevant providers or businesses
4	Provider	Submits a quote, instant hire acceptance, or booking slot
5	Customer	Compares options, selects provider, and confirms booking
6	Provider	Delivers the service or completes the job
7	Customer	Submits a star rating and written review
8	System	Updates provider reputation score and job history

3. Trade Connect Module – Trade Directory & Marketplace

3.1 Module Overview

TradeConnect is the core trade services directory and job marketplace. It connects homeowners and property managers with verified tradespeople across 14 primary service categories. The module supports job posting, quote collection, trade comparison, and post-job review.

3.2 Trade Services Directory

The following categories are supported. Each category includes multiple trade specialisations and typical job types.

3.2.1 Trade Categories & Roles

General Trades / Handyman Services

- Handyman / general repairer
- Home maintenance technician
- Property maintenance worker
- Furniture assembly specialist
- Small repairs & installation services

Typical Jobs:

- Fixing doors, locks, and shelves
- Minor plumbing and electrical fixes
- Home repairs and odd jobs
- Basic appliance installation

Plumbing Services

- Licensed plumber
- Drainage specialist
- Gas fitter
- Hot water system technician
- Blocked drain specialist

Typical Jobs:

- Pipe installation and repair
- Bathroom and kitchen plumbing
- Leak detection and remediation
- Gas line installation and compliance

Electrical Services

- Licensed electrician
- Electrical maintenance technician
- Air conditioning electrician
- Lighting installer
- Switchboard technician

Typical Jobs:

- Power outlet installation
- Fault finding and diagnostics
- Wiring and rewiring
- LED and lighting system setup
- Switchboard upgrades

Renovation & Construction Trades

- Home renovator
- General builder
- Structural builder
- Extension specialist
- Demolition worker

Typical Jobs:

- Full home renovations
- Room extensions and additions
- Structural changes and upgrades
- Bathroom and kitchen upgrades

□ Carpentry Services

- Carpenter
- Formwork carpenter
- Framing carpenter
- Roof carpenter
- Finish carpenter

Typical Jobs:

- Doors, windows, and frames
- Timber structures
- Decking and pergolas
- Furniture installation

Cabinet Making & Joinery

- Cabinet maker

- Joiner
- Kitchen installer
- Wardrobe installer
- Custom furniture builder

Typical Jobs:

- Kitchen cabinets
- Built-in wardrobes
- Bathroom vanities
- Custom woodwork and joinery

Cleaning Services

- Domestic cleaner
- Commercial cleaner
- End-of-lease cleaner
- Carpet cleaner
- Window cleaner

Typical Jobs:

- House and apartment cleaning
- Office and commercial cleaning
- End-of-lease deep cleaning
- Move-in/move-out cleaning

Painting & Decorating

- House painter
- Commercial painter
- Interior decorator
- Spray painter
- Wall texture specialist

Typical Jobs:

- Interior and exterior painting
- Renovation repainting
- Feature walls and murals
- Protective and industrial coatings

Landscaping & Gardening

- Landscaper
- Gardener
- Lawn care specialist
- Tree lopper / arborist
- Irrigation installer

Typical Jobs:

- Garden design and installation
- Lawn mowing and maintenance
- Tree trimming and removal
- Outdoor drainage and irrigation

Tiling & Flooring

- Tiler
- Floor installer
- Waterproofing specialist
- Carpet installer
- Timber floor installer

Typical Jobs:

- Bathroom and kitchen tiling
- Flooring installation and sanding
- Waterproof sealing and membranes
- Outdoor and commercial tiling

Security Services

- Security guard
- Mobile patrol officer
- CCTV installer
- Alarm system installer
- Access control technician

Typical Jobs:

- Home security system setup
- CCTV installation and configuration
- Commercial security patrols
- Alarm monitoring and maintenance

Moving & Transport Services

- Removalist
- Furniture mover
- Delivery driver
- Truck driver
- Heavy lifting specialist

Typical Jobs:

- Residential house moving
- Office and commercial relocation
- Furniture and appliance delivery

- Equipment and materials transport

Heating, Cooling & Appliances

- Air conditioning technician
- Refrigeration mechanic
- Appliance repair technician
- Heating system installer

Typical Jobs:

- AC installation, service and repair
- Refrigeration and cool room maintenance
- Washing machine and dishwasher repair
- Central heating installation

Specialist Trades

- Bricklayer
- Concreter
- Roofer
- Plasterer / drywall installer
- Scaffolder
- Welder

Typical Jobs:

- Brickwork and retaining walls
- Concrete slabs, paths and driveways
- Roof installation and repairs
- Plastering and rendering
- Structural welding and fabrication

3.3 Platform Category Structure (UI Navigation)

Category Group	Trade Types Included
 Home Services	Handyman, plumbers, electricians, cleaners
 Building & Renovation	Builders, carpenters, tilers, renovators, specialists
 Outdoor & Landscaping	Landscapers, gardeners, arborists, irrigation installers
 Safety & Security	CCTV installers, alarm technicians, security guards
 Moving & Transport	Removalists, delivery drivers, heavy haulage

Category Group	Trade Types Included
 Technical Services	AC technicians, refrigeration mechanics, appliance repairers

4. Hire-A-Me Module – Instant On-Demand Hiring

4.1 Module Overview

Hire-A-Me extends the Trade Connect directory with real-time, on-demand hiring capabilities. Customers can either post a job and wait for quotes, or immediately engage an available tradesperson using the "Hire Now" instant booking function.

4.2 Core User Flows

4.2.1 Customer Instant Hire Flow

Step	Action
1	Customer selects a service category from the directory
2	System displays nearby available tradespeople with profiles and ratings
3	Customer selects a tradesperson and views their profile
4	Customer chooses: "Request Quote" or "Hire Now" (instant booking)
5	Tradesperson receives notification and accepts or declines
6	Job is scheduled, confirmed, and added to both parties' dashboards
7	Service is delivered and customer submits a review

4.2.2 Tradesperson Flow

Step	Action
1	Tradesperson completes registration and category selection
2	Profile is built with skills, licenses, experience, and photos
3	System pushes matching job requests and instant hire notifications
4	Tradesperson responds: quote submission or instant job acceptance
5	Job is managed through the dashboard (active, completed, history)
6	Completed jobs generate reviews and update reputation score

4.3 Unique Hire-A-Me Features

Feature	Description
 Hire Now Button	Skip the quote process — instantly book an available tradesperson

Feature	Description
 GPS Proximity Search	Display and prioritise tradespeople based on customer location
 Fixed-Price Services	Tradespeople can publish flat-rate pricing for standard jobs
 Verified Trade Badges	Visual indicators for licensed, insured, and verified providers
 Trust Score System	Composite score from ratings, completion rate, and response time
 Emergency Booking	24/7 urgent trade requests flagged for priority matching

5. Book Easy Hub Module – Booking & Business Listings

5.1 Module Overview

BookEasy Hub provides an all-in-one online booking and business marketplace for non-trade service providers. It supports appointment scheduling, business profile listing, proposal creation, and customer engagement across four primary sectors.

5.2 Supported Booking Sectors

5.2.1 Beauty & Salon Bookings

Supported business types: hair salons, beauty salons, nail salons, makeup artists, barbers, and day spas.

Feature	Detail
Stylist / Artist Selection	Customers choose a specific staff member based on profile and speciality
Service Menu	Businesses publish a complete list of services with duration and pricing
Package Booking	Bundle multiple services (e.g., cut + colour + blow-dry) into one booking
Recurring Appointments	Customers can schedule recurring bookings (e.g., weekly, fortnightly)
Cancellation Policy	Configurable cancellation window with optional deposit retention

5.2.2 Party Hall & Event Venue Bookings

Supported venue types: party halls, wedding venues, conference halls, banquet halls, and event spaces.

Feature	Detail
Venue Availability Calendar	Real-time calendar showing available and booked dates
Guest Capacity Display	Minimum and maximum headcount per room or space configuration
Event Package Pricing	Tiered pricing by package (basic, standard, premium)
Catering Options	Optional catering add-ons or partner caterer listings
Decoration Packages	Selectable decoration themes with visual examples
Event Inquiry Form	Detailed intake form for custom quotes and site inspections
Photo / Video Gallery	Past event showcase to assist customer decision-making

5.2.3 Doctor & Healthcare Bookings

Supported provider types: general practitioners, dentists, physiotherapists, specialists, and clinics.

Feature	Detail
Doctor / Provider Profile	Full bio, qualifications, specialty, languages spoken, and clinic hours
Specialty Listing	Filter by medical specialty (e.g., cardiology, paediatrics, dental)
Appointment Scheduling	Real-time slot selection with instant or approval-based confirmation
Online Consultation Requests	Telehealth booking option with video link integration (Phase 2)
Multi-Clinic Support	Providers with multiple locations manage bookings across all sites
Medical Service Categories	Categorised service types (check-up, procedure, specialist review, etc.)

5.2.4 Professional & Local Business Listings

Supported types: consultants, trainers, freelancers, restaurants, gyms, coaching centres, and local repair services.

5.3 Proposal & Quote Creation Module

Any registered business can use the built-in Proposal Builder to create professional, branded quotations and proposals.

Feature	Detail
Proposal Builder	Drag-and-drop editor with section templates (scope, pricing, timeline)
Quote Generation	Itemised line-item pricing with tax calculation and discount fields
PDF Export	One-click export of any proposal to a branded PDF document
Digital Approval	Customer e-signature and approval workflow with audit trail
Proposal Templates	Pre-built templates for common service types (renovation, cleaning, event)
Version History	Track proposal revisions and customer responses
Attachments	Attach supporting documents, images, and terms & conditions

6. Functional Requirements

6.1 Customer Features

Requirement ID	Feature	Description	Priority
FR-C-001	Registration & Login	Email, phone, or social SSO registration with email verification	Must Have
FR-C-002	Job Posting	Multi-step job posting with category, description, budget, and photos	Must Have
FR-C-003	Service Search	Full-text and filter-based search by category, location, and availability	Must Have
FR-C-004	Provider Profiles	View tradesperson or business profiles with ratings, photos, and certifications	Must Have
FR-C-005	Quote Management	Receive, compare, and respond to multiple quotes in a unified inbox	Must Have
FR-C-006	Instant Hire	Directly book an available provider without a quote negotiation step	Must Have
FR-C-007	Appointment Booking	Calendar-based booking with real-time slot availability	Must Have
FR-C-008	In-App Messaging	Direct chat with providers including photo and document sharing	Must Have
FR-C-009	Reviews & Ratings	Submit star ratings (1-5) and text reviews after job completion	Must Have
FR-C-010	Payment Processing	Secure online payment with deposit and balance payment support	Phase 2
FR-C-011	Favourites	Save preferred providers to a personal shortlist	Should Have
FR-C-012	Booking History	View past, active, and upcoming bookings in a personalised dashboard	Must Have
FR-C-013	Notifications	Push and email alerts for quotes, booking confirmations, and messages	Must Have
FR-C-014	Dispute Lodgement	Submit a dispute or complaint for admin review	Must Have

6.2 Tradesperson Features

Requirement ID	Feature	Description	Priority
FR-T-001	Trade Registration	Register as a trade provider with license, insurance, and ABN fields	Must Have
FR-T-002	Category Selection	Select one or more trade categories and sub-specialties	Must Have
FR-T-003	Profile Builder	Build a public profile with bio, skills, certifications, and photo gallery	Must Have
FR-T-004	Lead Management	Receive and manage job leads with accept / decline / ignore actions	Must Have
FR-T-005	Quote Submission	Submit detailed quotes with itemised pricing, scope notes, and timeline	Must Have
FR-T-006	Instant Job Acceptance	Accept Hire Now requests from customers in real time	Must Have
FR-T-007	Schedule Management	Manage availability with a built-in calendar and busy/free status	Must Have
FR-T-008	Job History	View completed, active, and cancelled job records	Must Have
FR-T-009	Customer Messaging	Respond to customer enquiries through the in-app chat system	Must Have
FR-T-010	Ratings & Badges	Earn verified ratings and platform badges based on performance	Should Have
FR-T-011	Earnings Dashboard	Track revenue, job counts, and payout status (Phase 2)	Phase 2
FR-T-012	Subscription Management	Manage plan tier, lead credits, and featured listing status	Should Have

6.3 Business Owner Features

Requirement ID	Feature	Description	Priority
FR-B-001	Business Registration	Register business with ABN, category, address, and contact details	Must Have
FR-B-002	Business Profile Page	Customisable public page with logo, photos, description, and hours	Must Have
FR-B-003	Service Menu	Publish service items with duration, price, and description	Must Have
FR-B-004	Booking Calendar	Real-time availability calendar with automated slot management	Must Have
FR-B-005	Staff Profiles	Add team members with individual availability and specialties	Must Have

Requirement ID	Feature	Description	Priority
FR-B-006	Proposal Builder	Create branded PDF proposals and quotations for customers	Must Have
FR-B-007	Booking Management	Accept, reschedule, and cancel bookings from a unified dashboard	Must Have
FR-B-008	Customer Messaging	Respond to enquiries and negotiate scope through in-app chat	Must Have
FR-B-009	Review Management	View and respond to customer reviews publicly	Should Have
FR-B-010	Featured Listing	Pay to feature business at the top of category search results	Should Have
FR-B-011	Analytics Dashboard	Track views, booking rates, revenue, and review scores	Should Have

6.4 Admin Features

Requirement ID	Feature	Description	Priority
FR-A-001	Provider Approval	Review and approve or reject trade and business registrations	Must Have
FR-A-002	License Verification	Manual and automated license and ABN validation	Must Have
FR-A-003	Category Management	Create, edit, and deactivate service categories and subcategories	Must Have
FR-A-004	Dispute Resolution	Review, mediate, and resolve customer-provider disputes	Must Have
FR-A-005	Review Moderation	Flag, edit, or remove reviews that violate platform policies	Must Have
FR-A-006	User Management	Suspend, deactivate, or reinstate any user account	Must Have
FR-A-007	Analytics Dashboard	View platform-wide metrics: signups, bookings, revenue, disputes	Must Have
FR-A-008	Subscription Management	Create and modify subscription plans and pricing tiers	Should Have
FR-A-009	Notification Management	Manage system-wide push, email, and SMS notification templates	Should Have

7. Non-Functional Requirements

7.1 Performance

Metric	Requirement
Page Load Time	Core pages load in under 2 seconds on standard 4G mobile connection
Search Response	Search results returned within 500ms for up to 10,000 concurrent listings
Booking Confirmation	Booking confirmation notifications delivered within 3 seconds
Uptime	Platform maintains 99.9% availability SLA (excluding planned maintenance)
Concurrent Users	System supports 10,000+ simultaneous users without degradation
Database Scalability	Horizontal database scaling supports up to 1 million registered users

7.2 Security

Requirement	Specification
Authentication	OAuth 2.0 / JWT with multi-factor authentication (MFA) option
Data Encryption	AES-256 encryption at rest; TLS 1.3 for all data in transit
Payment Security	PCI-DSS compliant payment gateway integration (Stripe or equivalent)
Privacy Compliance	Australian Privacy Act 1988 and GDPR compliant data handling
Penetration Testing	Annual third-party security audit and penetration testing
Session Management	Automatic session timeout after 30 minutes of inactivity
API Security	Rate limiting, API key authentication, and DDoS protection

7.3 Compatibility & Usability

Requirement	Specification
Responsive Design	Fully responsive across desktop, tablet, and mobile (iOS and Android)
Browser Support	Chrome, Firefox, Safari, Edge (latest 2 major versions)
Accessibility	WCAG 2.1 Level AA compliance for screen readers and keyboard navigation
Internationalisation	Foundation for multi-language support (Phase 2 rollout)
Offline Support	Basic offline functionality for mobile app (cached last-viewed content)

8. End-to-End Business Workflows

8.1 TradeConnect Workflow

Step	Actor	Action	System Response
1	Customer	Registers account and posts a job with photos, budget, and location	Job created and categorised; matching tradesperson alerts sent
2	System	Applies matching logic by category, location, and availability	Up to 5 matched tradespeople notified via push and email
3	Tradesperson	Reviews job details and submits a quote with scope and pricing	Quote delivered to customer dashboard with read receipt
4	Customer	Compares received quotes by price, rating, and availability	Comparison view with sorted ranking by trust score
5	Customer	Selects and hires preferred tradesperson	Job status updates to "Hired"; other quotes auto-declined politely
6	Tradesperson	Completes the job on-site and marks it complete in app	Job status updated; payment trigger sent (Phase 2)
7	Customer	Leaves a star rating and text review	Review published; tradesperson trust score recalculated

8.2 BookEasy Hub Workflow

Step	Actor	Action	System Response
1	Customer	Searches for a business or service type with location filter	Ranked listing of matching businesses returned
2	Customer	Views business profile, service menu, staff, and reviews	Business page displayed with live availability calendar
3	Customer	Selects a service, staff member, and available time slot	Booking form pre-populated with selected details
4	Customer	Confirms booking (with or without deposit payment)	Booking confirmation sent via email and push notification
5	Business	Receives booking notification and confirms or reschedules	Customer notified of any changes within 15 minutes
6	System	Sends 24-hour reminder to both parties	Automated reminder via email and push notification
7	Customer	Attends appointment and submits review after service	Review published; business analytics updated

9. Payment Module

9.1 Overview

The payment module is scoped for Phase 2 implementation. The following requirements are documented for planning purposes and early architecture decisions.

9.2 Payment Features

Feature	Description
Online Payments	Customers pay for bookings and jobs via credit/debit card or digital wallet
Deposit Collection	Configurable upfront deposit (fixed amount or percentage of total)
Full Payment at Completion	Balance collected upon job or service completion
Subscription Billing	Recurring billing for tradesperson and business subscription plans
Invoice Generation	Automatic PDF invoice creation for all completed transactions
Refund Management	Customer-initiated refund requests processed through admin review workflow
Platform Commission	Automated percentage-based commission deduction on completed jobs
Payout Processing	Weekly provider payouts via direct bank transfer or PayID

9.3 Supported Payment Methods

- Visa / Mastercard credit and debit cards
- Apple Pay and Google Pay
- PayPal
- AfterPay (buy-now-pay-later for larger jobs)
- Direct bank transfer (for high-value commercial jobs)

10. Business Model & Revenue Streams

10.1 Revenue Model

Revenue Stream	Mechanism	Applicable Module
Lead Credits	Tradespeople purchase credits to respond to job leads	TradeConnect / Hire-A-Me
Subscription Plans	Monthly/annual tiered plans for tradespeople and businesses (Basic, Pro, Premium)	All Modules
Booking Commission	Platform takes a percentage commission on completed bookings	BookEasy Hub
Featured Listings	Businesses pay to appear at the top of category search results	All Modules
Proposal Feature Access	Advanced proposal and quote tools unlock at Pro tier	BookEasy Hub
Advertising Packages	Sponsored listings and banner placement for premium providers	All Modules
Emergency Job Premium	Surcharge on urgent/emergency job matching service	Hire-A-Me

10.2 Subscription Tiers

Tier	Target User	Key Features	Indicative Price
Free / Basic	New providers testing the platform	Profile listing, receive 3 leads/month, basic reviews	AU\$0/month
Pro	Active tradespeople and small businesses	20 leads/month, proposal builder, priority matching, analytics	AU\$49/month
Premium	High-volume providers and established businesses	Unlimited leads, featured listing, verification badge, dedicated support	AU\$99/month
Enterprise	Multi-location businesses and franchises	Custom API access, branded portal, account manager, bulk staff accounts	Custom pricing

11. Mobile Application Requirements

11.1 Customer Mobile App

- Browse, search, and filter service providers by category and location
- Post jobs with photo upload from device camera or gallery
- Real-time booking calendar with time-slot selection
- In-app chat with push notification alerts
- View and manage active, upcoming, and past bookings
- Submit reviews and ratings directly from the app
- Track job status updates in real time

11.2 Provider Mobile App

- Receive instant push notifications for new job leads and bookings
- Accept, decline, or counter-offer on jobs and quotes
- Manage live availability calendar from mobile
- Chat with customers and share photos of completed work
- View earnings summary and job history
- Update profile and portfolio from mobile

11.3 Technical Specifications

Specification	Detail
Platforms	iOS 15+ and Android 10+
Development Approach	React Native (shared codebase) or Flutter — to be confirmed in technical design phase
Push Notifications	Firebase Cloud Messaging (FCM) for Android and APNS for iOS
Offline Mode	Cached provider profiles and booking history accessible without connectivity
Camera Integration	Native camera access for job photo uploads and profile photos
GPS Integration	Location permissions for proximity-based provider search
App Store Distribution	Apple App Store and Google Play Store

12. Future Enhancements (Phase 2 & Phase 3)

12.1 Phase 2 – AI & Automation

Feature	Description	Expected Impact
AI Job Matching	Machine learning model matches jobs to tradespeople based on skill, location, rating, and availability	Higher conversion rates, better customer satisfaction
Instant Quote Calculator	Customers receive an AI-estimated quote range before submitting a job	Reduced drop-off at job posting stage
License Database Integration	Automated integration with government licensing databases (e.g. VBA, Fair Trading)	Faster verification, higher provider trust
Video Consultation Booking	Healthcare providers offer telehealth appointments with integrated video call	Expanded reach for healthcare module
AI Chatbot Assistant	Conversational AI to guide customers through booking and job posting	Reduced support tickets, improved onboarding
Dynamic Pricing Engine	Demand-based pricing suggestions for tradespeople during peak periods	Increased provider revenue, better supply-demand balance

12.2 Phase 3 – Advanced Platform Features

Feature	Description
GPS Live Tracking	Customers track tradesperson en-route to job in real time
QR Code Check-In	Digital check-in for venue and healthcare appointments via QR scan
Loyalty & Rewards System	Customer loyalty points redeemable for discounts on future bookings
Multi-Language Support	Platform localised in Mandarin, Arabic, Vietnamese, and Spanish for Australian market
Review Trust Scoring	Advanced review authenticity algorithm to detect and suppress fraudulent reviews
Subscription Marketplace	Customers subscribe to a provider for regular recurring services at discounted rates
Franchise & Multi-Site Management	Enterprise tools for managing bookings and staff across multiple business locations

13. Appendices

Appendix A – Data Entity Summary

Entity	Key Attributes
User	user_id, name, email, phone, role, created_at, status
Tradesperson Profile	profile_id, user_id, categories[], licenses[], bio, rating, trust_score
Business Profile	business_id, user_id, business_name, abn, categories[], address, hours{}
Job Post	job_id, customer_id, category, description, budget, status, images[], created_at
Quote	quote_id, job_id, tradesperson_id, amount, scope, timeline, status
Booking	booking_id, customer_id, business_id, service_id, slot_datetime, status, staff_id
Review	review_id, reviewer_id, target_id, rating (1-5), comment, created_at, verified
Proposal	proposal_id, business_id, customer_id, items[], total, status, pdf_url, signed_at
Payment	payment_id, booking_or_job_id, amount, gateway_ref, status, created_at
Notification	notification_id, user_id, type, title, body, read, created_at

Appendix B – Revision History

Version	Date	Author	Changes
1.0	2024-Q3	Initial Author	TradeConnect SRS – first draft
1.1	2024-Q4	Product Team	Added Hire-A-Me module and instant booking flow
1.2	2025-Q1	Product Team	Added BookEasy Hub – salons, healthcare, and event venues
2.0	14/05/2026	SilverBricks Product Team	Consolidated unified SRS – all modules, functional requirements, NFRs, business model, and roadmap

Appendix C – Compliance References

- Australian Privacy Act 1988 (Cth) – Data collection and handling obligations
- Spam Act 2003 (Cth) – Commercial electronic messaging requirements
- Australian Consumer Law (ACL) – Fair trading and refund policy obligations

- Victorian Building Authority (VBA) – Tradesperson licensing verification reference
- WCAG 2.1 Level AA – Web Content Accessibility Guidelines
- PCI-DSS v4.0 – Payment Card Industry Data Security Standard
- ISO/IEC 27001 – Information security management system (target certification)
